

Y3 4 Key knowledge for this unit – Stone Age, Bronze Age & Iron Age

I know the way people lived changed through the three periods such as:

- Palaeolithic people (earliest Stone Age) lived in caves and were hunters.

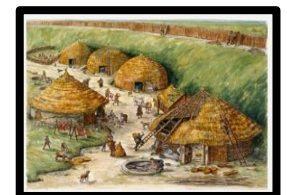

I know the way people lived changed through the three periods such as:

- Mesolithic people (Bronze Age) lived in rounded houses, with family groups and started to use bronze.

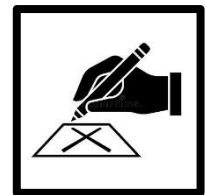

I know the way people lived changed through the three periods such as:

- Neolithic (Iron Age) created hill forts, lived in large groups and began to use iron tools.
- Living in large groups brought conflict to the communities.

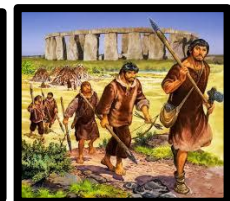

I know that pre-History – is a time period before written records.

I know that an archaeological dig is significant because it provides information about a place or people of a certain period.

I know that Nomadic people started to settle in communities.

I know that the Stone Age makes up 99.5% of our human history so far- understand a sense of duration.
